DETAILED ACTION

1. This is response to the amendment filed on 07/30/04.

Allowable Subject Matter

2. Claims 1-9 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

The amendment filed on 07/30/04 has overcome the 35 U.S.C. 112, second paragraph rejection in the last office action. Prior art of record (closest reference, Crawford and Lee et al., US 6,633,616 and US 6,150,892, respectively) teach method and apparatus for frequency offset compensation using tracking loop. The tracking loop continuously compensates for the frequency offset in two stages, namely coarse and fine stages. And the cost function is utilized for obtaining a threshold so as to determine which stage the loop should be operating in. The present invention doesn't utilizes a tracking loop, instead, the present invention assumes a coarse frequency offset after compensation by a previous circuit that will not exceed approximately ± 10 kHz, and uses a cost function to determine a fine-frequency offset for use in a subsequent circuit providing for frequency compensation in OFDM radio transmission. Prior art of record, taking alone or in combination, fails to fairly teach the above underlined subject matter in independent claim 1 (claims 2-7, 9, depend from claim 1) and similarly in independent claim 8. Thus, claims 1-9 are found to be novel and unobvious over prior art of record.
